

ENVIRONMENT POLICY

At NorthTech SLE, environmental protection is paramount. We believe:

Environmental harm resulting from our activities must be minimised

OUR COMPANY

NorthTech SLE and its employees have an obligation to preserve the environment for future generations

OUR EMPLOYEES

NorthTech SLE will conduct business in a way that seeks to minimise environmental impact through all stages and aspects of the business, from purchasing and production through to completion and disposal.

Maintains an Environment System certified to ISO 14001:2015.

Complies with relevant environmental legislation.

Identifies and seeks to minimise potential environmental impacts by monitoring performance via internal and external audit and undertaking improvement actions.

Consults with employees, contractors and suppliers, to enhance environmental protection & capture improvement suggestions.

Ensures our Environment Policy is effectively developed, implemented, maintained and communicated.

Recognises the impact of climate change and seeks to reduce carbon emissions.

Provides necessary environmental information and training to all NorthTech SLE employees and contractors.

Investigates and reports on all environmental incidents to capture learnings and prevent recurrence.

Considers 'environmentally friendly' products during purchasing.

Minimises waste production. Promotes recycling at all levels within the business, particularly of metals.

Emphasises sustainability and conserves resources, such as water and energy.

Report to their supervisor any environmental concerns.

Cooperate with all NorthTech SLE environment programs and follow specified systems of work.

Consider environmental impact in all work they undertake.

Actively seek to reduce resource consumption and undertake recycling.
